

cell structure and function pdf

a eukaryotic cell. These membranes are related either through direct physical contact or by transfer of vesicles (sac of membrane). In spite of these links, these membranes have diverse functions and structures: nuclear envelope, endoplasmic reticulum, Golgi apparatus, lysosomes, vacuoles, and the plasma membrane.

The cell is the lowest level of structure capable of

Cell " Structure and Function BIOLOGY Notes Table 4.1 Differences between Eukaryotic and Prokaryotic cells Eukaryotic cell (eu = true, karyon = nucleus) Prokaryotic cell (Pro = early/primitive) 1. Nucleus distinct, with well formed 1. Nucleus not distinct, it is in the form nuclear membrane. of nuclear zone "nucleoid"™. Nuclear membrane absent. 2.

CELL " STRUCTURE AND FUNCTION - National Institute of

Cell " Structure and Function BIOLOGY 83 Notes MODULE - 1 Diversity and Evolution The plasma membrane is made of proteins and lipids and several models wereof Life proposed regarding the arrangement of proteins and lipids. The fluid mosaic model proposed by Singer and Nicholson (1972) is widely accepted. It is represented in Fig 4.3.

Notes CELL " STRUCTURE AND FUNCTION

PARTS OF THE EUKARYOTIC CELL The structures that make up a Eukaryotic cell are determined by the specific functions carried out by the cell. Thus, there is no typical Eukaryotic cell. Nevertheless, Eukaryotic cells generally have three main components: A cell membrane, a nucleus, and a variety of other organelles. THE CELL MEMBRANE 1.

INTRODUCTION TO THE CELL - BiologyMad A-Level Biology

At the most basic Level, the cell's overall structure can be viewed as: 1. Cell Membrane 2. Nucleus 3. Organelles 4. Cytoplasm 1. Cell Membrane: the thin layer which separates the cell contents from it's environment. Plant cells also have a cell wall surrounding the cell membrane. 2. Nucleus: specialized structure within the cell which contains DNA and controls cell functioning and reproduction. 3. Organelles: small bodies with specific structures and functions within the cell. 4.
