DevOps is an approach to lean and agile software delivery that promotes closer collaboration between lines of business, development and IT operations. Historically, development and operations, and even testing, have been siloed operations. DevOps brings them together to improve agility and reduce ...

The maximum segment size (MSS) is a parameter of the options field of the TCP header that specifies the largest amount of data, specified in bytes, that a computer or communications device can receive in a single TCP segment. It does not count the TCP header or the IP header (unlike, for example, the MTU for IP datagrams). The IP datagram containing a TCP segment may be self-contained within a ...
