In chemistry, the valence or valency of an element is a measure of its combining power with other atoms when it forms chemical compounds or molecules. The concept of valence developed in the second half of the 19th century and helped successfully explain the molecular structure of inorganic and organic compounds. The quest for the underlying causes of valence led to the modern theories of ...

The following is a list of people who are considered a "father" or "mother" (or "founding father" or "founding mother") of a scientific field. Such people are generally regarded to have made the first significant contributions to and/or delineation of that field; they may also be seen as "a" rather than "the" father or mother of the field. Debate over who merits the title can be perennial.

TABLE OF CONTENTS . Chapter 2. THE PROGRESSIVE DECLINE OF MODERN CIVILIZATION. THAT modern man is declining in physical fitness has been emphasized by many eminent sociologists and other scientists. That the rate of degeneration is progressively accelerating constitutes a cause for great alarm, particularly since this is taking place in spite of the advance that is being made in modern science ...
